Prema tome, upotreba procesa prema ovom pronalasku omogućava direktnije korišćenje vrednih konstituenata surutke, dobijene prilikom proizvodnje sira.

(54) USE OF HIGH LACTOSE, HIGH PH WHEY IN THE PRPARATION OF MILK PRODUCTS

(57) The present invention relates to the use of of liquid high lactose, high pH whey as an ingredient in the standardisation of a dairy product; and a process for the manufacture of a dairy product comprising the steps: a) obtaining liquid high lactose, high pH whey, in particular

from the coagulation of casein in milk; and b) admixing the high lactose, high pH whey obtained in step a) with one or more ingredients comprising: vegetable fat(s), animal fat(s), vegetable protein(s), animal protein(s) and natural or artificial sweetener(s), such as natural or artificial sugar(s), fruit and fruit juice. The use and the process according to the invention accordingly enables a more direct utilization of the valuable constituents of whey obtained from cheese production. The dairy products obtainable by the process has a lower ratio casein:whey proteins, compared to traditionally dairy products.

(72) CVEJIN, Nikola, Svetog Nikole 135, 21230 Žabalj, RS

(57) Mašina za pranje voća i povrća sastoji se od rupičastog bubnja od nerđajućeg metala (1) koji je zaštićen kućistem (2), bubanj se nalazi na postolju (3) koje je ojačano i ujedno drži balans mašini (31), na postolju su bočni el. motor (4) koji vrti bubanj u smeru kazaljke na satu preko svoje remenice (29) i remenice na bubnju (28) a povezane su remenim kaišem(30). Gornji el. motor (5) je pričvršćen na postolje (3) na gornji stalak (9) iz el. motora se produžava osovina (6) koja prolazi kroz prozirni pvc poklopac (8) a na nju se pričvršćuju četke ili sundjeri (7). Ovaj motor vrti suprotno kazaljke sata. Motorna osovina (6) se uranja kroz otvor (10) koji je obložen diftunjom (11) stalak (9) se povlači na dole tako da poklopac (8) naleže na otvor bubnja (10). Dotok vode se vrši kroz pvc crevo (27), voda se dovodi preko el. ventila (20) a regulator (21) određuje nivo vode u bubnju. Potrebna količina vode dotiče u bubanj kroz pvc crevo do bubnja (24) pomoću vremenskog prekidača (16), bočni motor (4) se aktivira a potencijometar (18) služi za regulisanje brzine tj. broja obrtaja bočnog el.motora (4) koji je zaštićen kućistem (33).Ova mašina služi za pranje voća i povrća u higijenskim uslovima bez mogućnosti oštećenja ploda bez obzira na vrstu jer se mogu regulisati broj obrtaja kao i dužina samog pranja.

(54) WASHING MACHINE FOR FRUITS AND VEGETABLES

(57) Invention herewith described refers to a washing machine for fruits and vegetables consists of a hollow drum made of stainless metal (1) protected by a housing (2), the drum positioned on a reinforced stand (3) and at the same time it provides a balance to the machine (3) on the stand, where are: a lateral electric motor (4) which revolves the drum in the direction of a hand through its belt (29) and the drum belt (28) coupled by a pulley (30). The top electric motor (5) is fixed to the stand (3) onto the upper stand (9), the shaft (6) extends from the electric motor and goes through an opening (10) coated by a gasket (11) sealing layer, the stand (9) is drawn downward so that the hood (8) rests onto the drum opening (10) water flow is carried through a PVC hose (27), the water is brought through electric valve (20) and the regulator (21) determines the water level in the drum, the required quantity of water flows through the PVC hose into the drum (24) by means of a dwell timer (16) a lateral motor (4) a potentiometer (18) is initiated, in use to regulate speed i.e. number of revolutions of the lateral electric motor (4) protected by a housing (33). This machine is used for washing fruits and vegetables in hygienic conditions with no possibility to damage the fruit itself and regardless of the type as the number of revolvments and the duration of the washing can be regulated.

 (57) Pronalazak spada u oblast podnih obloga, namenjenih za opremanje domaćinstava i sportskih sala a konkretno se odnosi na tepih sa vazdušnim slojem za ostvarivanje zaštitne i termoizolujuće funkcije. Predmetnim pronalaskom rešen je tehnički problem konstrukcije tepiha koji može da se izrađuje kao klasična prostirka ili savremeno dizajnirana podna obloga izrađena od poznatih vrsta materijala. Ovo je izvedeno tako što tepih prema pronalasku predstavlja dvoslojnu podnu oblogu koju čine natkani sloj 1 i dušek 2 izrađen od gumiranog platna i podeljen na komore 3 povezane kanalima 4 kroz koje se ubacuje vazduh kroz standardni ventil 5, pri čemu je obodna površina 11 obrazovana od tri reda komora 6, 7 i 8 stepenasto poređanih tako da se debljina dušeka 2 linearno smanjuje prema obodu. Sa

gornje strane dušeka 2 nalepljene su čičak trake 9 analogne čičak trakama 10 na donjoj strani natkanog dela 1, dok su na temenima i u središtu dušeka 2 nalepljene orebrene gumene podloške 12 i 13.

(54) CARPET WITH AN AIR-LAYER FOR ACCOMPLISHING PROTECTIVE AND THERMOINSULATING FUNCTION

(57) Invention in the subject belongs to the field of floor coverings intended to furnish households and sports halls and more precisely it refers to a carpet with an air-layer for accomplishing protective and thermoinsulating function. Invention herewith described solves the problem of construction of the carpet which can be made as a standard floor covering article or a modern design floor coating made of known types of material. This is achieved so that the carpet according to the invention represents a two-layer floor covering which would be made of a woven layer 1 and a cushion 2 made of a rubberized linen and divided into the chambers 3, connected by the channels 4 through which air is inserted through a standard valve 5, where the peripheral area 11 consists of three rows of chambers 6, 7 and 8 being step-like arranged so that the thickness of the cushion 2 linealy reduces toward the periphery. From the upper side of the cushion 2 there are Velcro strips 9 analogous to the Velcro strips 10 on the low side of the woven part 1, while on the surfaces and the central part of the cushion 2 there are glued ribbed rubber washers 12 and 13.

(57) Електрични сигнал из електронског степена (сл.4-к.) се доводи директно на кондензаторно спрегнуте предњу (1) и задњу (2) плочу, а преко задње плоче (2) и на 77 јединичних радијационих кондензаторних елемената (3) који су кондензаторно спрегнути преко квадратних металних плочица (4) са предњом плочом (2). Тако се остварује сложено кондензаторно коло кроз кога протиче ВФ струја пуњења и пражњења, које се сабирају и протичу кроз тело сваког од радијационих елемента (3), које је у облику ваљкастог проводника, тако да се око њега индукује електромагнетско поље. Суперпозицијом ових јединичних поља, добија се збирно поље које се зрачи преко квадратних металних плочица (4) искључиво испред предње плоче (2). Због тога је за напајање Уређаја потребно обезбедити неупоредиво мање електричне енергије него у односу на еквивалентне индуктивне радијаторе од којих због вишеструко једноставније конструкције има значајно нижу цену производње, па је погодан и за кућне примене.

(54) DEVICE FOR ELECTROMAGNETIC WAVETHERAPY OF PHYSIOLOGICAL AND MENTAL DISORDERS

(57) Invention herewith described refers to an electric signal from electronic scale (Fig. 4-k) is brought directly to capacitatively enaged plates a front (1) and a rear (2), and over the rear plate (2) and to 77 singular radiating capacitive elements (3) being capacitatively engaged over the square metal plates (4) with the rear plate (2). Therewith achieved is a complex capacitive circuit through which flows HF charging and discharging current, which are collected and flow through the body of each of radiating elements (3), which has the form of a cylindrical conductor, so that a magnetic field is induced around it. Superpositioning of these unit fields, there obtained is a cummulative field which radiates through a square metal plates (4) exclusively in front of the front plate (2). Therefore, power supply for the the device requires immensely less electric energy than the equivalent inductive radiators from which due to a multiple simple construction it has a significantly lower production cost, hence it is suitable even for application in households.

(57) Sa postojećom tehnikom masovnog otkopavanja moćnih homogenih slojeva Istočnih ležišta Kolubare ostvarivana je proizvodnja kvalitetnog uglja za elektrane uz visoko iskorišćenje geloških rezervi uglja. Otkopavanjem raslojenog Zapadnog ležišta Tamnava nije više moguće istovremeno obezbediti dobar kvalitet uglja za elektrane uz zadovoljavajuće iskorišćenje rezervi uglja. Ovim pronalaskom nastali tehnički problem rešava se obogaćivanjem niskokvalitetnog rovnog uglja postupkom ribanja u vodenoj sredini. Izdrobljeni rovni ugalj se meša sa vodom i trljanjem u

opremi za ribanje oslobađa veze sa jalovinom. Čišćenje i pranje se obavlja na sitima u dva stepena:

- Na Primarnom čišćenju se kao nadrešetni proizvod dobija Krupan očišćen ksilitski ugalj namenjen domaćinstvima i industriji. Podrešetni proizvod, sitan ugalj sa jalovinom, ide na sekundarno čišćenje.
- Na Sekundarnom čišćenju kao nadrešetni proizvod dobija se Sitan očišćen ugalj za potrebe termoelektrana. Kao podrešetni proizvod odstranjuje se velika masa Jalovine u obliku mulja i odlaže u otkopani prostor površinskog kopa.

(57) The existing methods for bulk mining of homogenous coal seams from Kolubara Coalfields were over the years adequate for production of a quality coal feed to power plants and high recovery of geological reserves. With recent transition of mining activities into the Western parts of Kolubara Coalfields, it is no longer technically possible to use the same methods for production of a high quality coal feed to power plants and high recovery of geological reserves. With recent transition of mining activities into the Western parts of Kolubara Coalfields, it is no longer technically possible to use the same methods for production of a high quality coal feed and achieving satisfactory recovery of coal reserves. This patent provides solution to above problem by implementing a new process of low-rank coal beneficiation using scrubbing. The Run-of-mine xhilit coal is crushed, slurried with water and bonds between the clean coal and waste components are broken during scrubbing. This process is performed in two stages:

Level 1. The Primary cleaning stage where the screen oversize product is washed Coarse Cleaned Coal for households and industrial use, while screen undersize containing fine coal fractions with waste matter, is directed to the Secondary cleaning.

Level 2. The Secondary cleaning stage where the washed oversize product is Fine Cleaned Coal to be used as a feed to power plants, and screen undersize product is Waste in form of a slurry to be disposed into redundant portions of existing pits.

If the iron is in the meantime positioned horizontally or vertically, upon a certain interval the iron becomes switched-off. In order to detect the hand, either a capacitative sensor or a photo sensor are used. The capacitative sensor has a Navajo consumption and the photosensor is more suitable for assembling.

(57) Invention herewith described refers to a technological process for wine preparation from the black currant with no chemical agents, the invention belongs to the field of preparation of alcoholic beverages, and more precisely it refers to the production of wine from the black currant at room temperature and normal atmospheric pressure, with no chemical agents used. Ripe, fresh and sound fruits of the black currant, not previously being treated by chemical agents are pressed, crushed to a pulp and left aside in a vessel for fermentation for 21 days. Thereupon, such raw wine is poured into the enamel vessels or a stainless steel vessels wherein its treatment continues with pouring and whirling currents with the addition of crystal sugar whereby all the lees are removed from the wine, fermentation is accelerated and gradual stabilization of wine is obtained thereupon obtained is the black currant wine of desired content of ethanol, clarity and bouquet. The whole process of preparation of the black currant wine is appropriately tested and when the desired effect of the wine is obtained, the wood barrels and therein is kept wine for at least a month in the cellars, thereupon the wine is bottled, and they are set aside to rest from four to up to six months in the cellars prior to its use.

(57) Dezinfekcija vode za piće, industriju hrane, bezalkoholnih i alkoholnih pića, pivara, bazene za kupanje, stočne farme, i sl., neophodan je korak da bi se obezbedila kvalitetna, higijenski ispravna voda. Ovaj pronalazak obezbeđuje nov postupak za dezinfekciju vode korišćenjem vodenog rastvora natrijumhipohlorita proizvedenog u uređaju prema ovom pronalasku, gde je uređaj lociran na mestu gde se obavlja analiza vode na sadržaj hlora i, po potrebi, hlorisanje vode. Hlorisanje prema protoku se primenjuje kada je biohemijski kvalitet sirove vode stabilan (podzemna, bunarska voda), a pri tome se potrošnja menja u toku vremena. Najčešće se koristi prilikom primarnog tzv. «osnovnog hlorisanja» kada sirova voda dolazi u vodovod iz vise pravaca ili bunara, pa po potrebi nekada imamo veću, a nekada manju proizvodnju/potrošnju.

Hlorisanje prema rezidualu se primenjuje kada promene protoka sirove vode nisu velike tokom vremena i kada su te promene linearne, pri čemu se menja kvalitet (biohemijski sastav) vode. Najčešće se koristi prilikom sekundarnog «korektivnog hlorisanja» kada sirova voda dolazi iz vodovoda već pripremljena i delimično hlorisana (zadovoljena hlorna potreba/hlorni broj). Korektivno hlorisanje ima zadatak da koriguje rezidual vode zbog promenljivog biohemijskog sastava vode i delimično zbog promene protoka. U manjim sistemima hlorisanje prema rezidualu se koristi kao osnovni i jedini postupak hlorisanja. Automatski sistem za doziranje natrijumhipohlorita prema protoku i/ili prema rezidualu u postupku prečišćavanja vode hlorisanjem, prema pronalasku opisuje uređaje za doziranje i automatizovane postupke koji se primenjuju u vodovodnim sistemima za dezinfekciju, odn. hlorisanje vode u cilju njenog prečišćavanja da bi bila pogodna za piće.

(54) AUTOMATIC SYSTEM FOR DOSAGE OF SODIUM HYPOCHLORITE DEPENDING ON FLOW VOLUME AND /OR RESIDUAL COMPOSITION IN THE PROCESS OF WATER PURIFICATION BY CHLORINATION

(57) Disinfection of water intended for drinking, food industry, non-alcoholic and alcoholic drinks productions, breweries, swimming pools, cattle farms, etc., represents a necessary step in order to provide good quality, clean drinking water. This invention provides a new process of water disinfection by using an aqueous solution of sodium hypochlorite produced in the device according to this invention, wherein the device is placed in a location where contents of chlorine in water are tested and, if necessary, water chlorination is performed. Chlorination depending on flow volume is applied where biochemical quality of non-processed water is stabile (ground water, well-water) and the consumption changes with the

course of time. Most often it is used in primary, so called, "basic chlorination" when non-processed water enters the water-works from several directions or wells and therefore production/ consumption is sometimes higher and sometimes lower. Chlorination depending on residual composition is applied when changes in flow volume of non-processed water are not significant during course of time and when they are linear, wherein the quality (biochemical composition) of water is changed. Most often, it is used in secondary "corrective chlorination" when non-processed water arrives from water works already prepared and partially chlorinated (acquired the necessity for chlorinate/chlorine number). Corrective chlorination aims to correct the water residual due to changeable biochemical composition of water and partially due to changes in flow volume. In the smaller systems, chlorination depending on residual is used as basic and the only chlorination process. Automatic system for dosage of sodium hypochlorite depending on flow volume and/or residual composition in the process of water purification by chlorination, as per this invention describes devices for dosing and automated processes applied in water works systems for disinfection, i.e., water chlorination in order to make it suitable for drinking.

(57) Проналазак припада области електронике и радиотехнике. Проналазак решава проблем брзог преноса аларма од посетиоца плаже до службе за спасавање, службе хитне помоћи и полиције на уређеној плажи. Састоји се из предајника аларма, пријемника аларма и ретранслатора и централног пријемника аларма. Предајници аларма су распоређени по плажи на међусобном растојању од 50 - 100 метара и на њима се налазе тастери, доступни посетиоцима плаже, за иницирање слања аларма. Пријемник аларма и ретранслатор прима аларме од одређеног броја предајника аларма и шаље их централном пријемнику аларма. Веза између уређаја овог система је остварена помоћу релативно јефтиних радио модула који раде на фреквенцији око 434 MHz у ISM (industrial, scientific, medical) опсегу фреквенција намењеном за индустријску, научну и медицинску примену. Применом овог система у

систем безбедности плаже су активно укључени и посетиоци плаже, тако што им омогућава да, када уоче одређену опасност, једноставним притиском на тастер најближег предајника аларма позову службу спасавања, хитне помоћи или полицију. На овај начин безбедност посетилаца плаже се подиже на виши ниво, посебно у "нерадно време плаже" и "ван сезоне купања", када служби безбедности на плажи нема а посетилаца на плажи има.

(54) RADIO ALARM SYSTEM FOR BEACH

(57) Invention herewith described refers to the fields of electronics and radiotechniques. The invention solves the problem of fast transmission of alarms from the beach visitors to the rescue services, ambulance cars and the police at the secured beach. It consists from the alarm transmitter, alarm receiver and a retranslator receiver and a central receiver of the alarm. The alarm transmitters at the beach are distributed from each other of about 50 to 100 meters and thereon there are keys available to the beach visitors, for initiation of the alarm signal. The alarm receiver and the retranslator receives alarms from a number of transmitters and forwards them to the central alarm receiver. The communication between the devices of the system is accomplished by means of a relatively cheap radio moduls operating at the frequency of about 434 MHz in ISM (industrial, scientific, medical) range of frequencies intended for industrial, scientific and medicinal application. Application of this system in the beach rescue system involves actively even the beach visitors, in that it provides to them that, upon

noticing any danger, by a simple press to a key of the nearest alarm transmitter, they alarm the rescue service, ambulance and the police. In this way the safety of the beach visitors is advanced, and particularly during the "closed hours" of the beach and "upon the beach season" when, even though there are visitors, there is no rescue service at the beach.

(57) Kapacitivna tastatura se sastoji od više parova elektroda odnosno od više kapacitivnih senzora (2). Jedan senzor određuje jednu tačku. Skup svih signala iz kapacitivnih senzora se multipleksira (1) i odvodi do kontrolne logike koja prepoznaje koji je senzor aktivan i određuje tačku na tastaturi koja je pritisnuta.

(54) CAPACITATIVE KEYBOARD

(57) Invention herewith described refers to a capacitive keyboard which consists of several electrode pairs i.e. several capacitive sensors (2). One sensor determines one point. The assembly of all the signals from the capacitive sensors is multiplied (1) and brought to the control logic that recognizes the sensor as an active one and determines the point typed at the keyboard.

ИЗВЕШТАЈ

СА 38. САСТАНКА КОМИТЕТА ЗА ПАТЕНТНО ПРАВО ЕВРОПСКЕ ПАТЕНТНЕ ОРГАНИЗАЦИЈЕ

Минхен, 23 – 24. фебруар 2010. године

Наташа Миловановић, патентни испитивач у Одељењу за машинство, електротехнику и општу технику

Комитет за патентно право одржао је свој 38. састанак у Минхену, у седишту Европске патентне организације, 23. и 24. фебруара 2010. године, са господином Михаљ Фичором (НУ) као председавајућим. Састанку су присуствовали представници чланица Европске патентне организације, а као посматрачи и представници Републике Србије, WIPO-а, Европске комисије, ЕПИ-а (Института професионалних заступника пред Европским заводом за патенте) и Business Europe. Републику Србију представљала је Наташа Миловановић, патентни испитивач у Одељењу за машинство, електротехнику и општу технику.

Састанак је отворио председник Комитета који је поздравио све присутне, а посебно оне који први пут учествују у раду Комитета и предложио следећи дневни ред:

1. Усвајање дневног реда (документ СА/PL 1/10).
2. Усвајање записника са 37. Састанка Комитета за патентно право (документ СА/PL 11/09).
3. Измене Правилника за спровођење КЕП-а (документ СА/3/10)
4. Процедурална ефикасност (документ СА/162/09).
5. Хармонизација патентног закона: ажурирање (документ СА/ PL 3/10).
6. Разно.

1. Комитет је једногласно усвојио дневни ред, као што је и предложено у документу СА/PL 1/10.
6. Записник са 37. састанка Комитета који је представљен у документу СА/PL 11/09 је усвојен са једним амандманом делегације Шпаније.
3. Комитет за патентно право требало је да да мишљење о предлогу измена Правилника о спровођењу – правило 71. КЕП-а (бивше правило 57. КЕП-а 1973), које се односи на поступак испитивања и које је у последњој декади претрпело бројне измене. Циљ ових измена је да се смањи период између комуникације, којом се подносилац обавештава о намери одсека за испитивање да призна Европски патент и тренутка објаве одлуке о признању у службеном гласилу. Наиме, пре

2002. године, последња фаза у процедури за признање обухватала је двостепени поступак. Први део се односио на комуникацију којом се подносилац пријаве позива да достави сагласност на текст за признање. Након дате сагласности подносиоцу пријаве шаље се друга комуникација којом се обавештава да достави превод патентних захтева на друга два службена језика ЕПО-а, као и да плати таксе за признање и штампу. У овом контексту постојала је пракса Одсека за испитивање да уз прву комуникацију достави подносиоцу и корисне предлоге у вези са текстом пријаве. 2002. године, оваква процедура је замењена једностепеним поступком који више није захтевао одобрење коначног текста. Дакле оно што се некада радило у две одвојене комуникације овим изменама је искомбиновано у једну. Плаћање такси и достављање превода сматрало се одобрењем текста за признање. Овим изменама скратио се период признања за 4-5 месеци, у случају директног признања (85% случајева). Међутим у преосталих 15% случајева подносиоци, који се не слажу са текстом, на комуникацију по правилу 71(3) одговарају изменама и/или исправкама грешака. Ово додатно компликује процедуру и доводи до додатних трошкова и додатних активности, и за подносиоца пријаве и за ЕПО. Због свега наведеног предложене су измене правила 71 КЕП-а и то:

- у случајевима када подносилац пријаве достави захтев за измене и/или исправку грешке текста који Одсек за испитивање намерава да призна у року предвиђеном у комуникацији по правилу 71(3), уводи се додатни корак у поступку како би се постигао договор о коначном тексту и одложило плаћање такси и достављање превода.
- ако Одсек за испитивање прихвати измене тј. исправку грешке, обавештава подносиоца о томе и позива га да у року од два месеца достави потребан превод захтева и плати таксе.
- ако Одсек за испитивање не да сагласност на предложене измене, односно исправке процедура се наставља слично тренутној процедури, с тим што Одсек за испитивање мора дати прилику подносиоцу пријаве да у року од

два месеца достави своју образложену изјаву и примедбе.

- за случајеве када Одсек за испитивање очекује да ће се подносилац сложити са изменама или исправком текста који намерава да призна, Одсеку за испитивање даће се могућност да предложи измене или исправке у овој фази поступка.
- измене у делу који се односи на плаћање додатних такси за патентне захтеве, случајеви у којима је могуће рефундирати таксе, као и случајеви када то није дозвољено;
- подносилац се не саглашава само са текстом који ЕПО намерава да призна, већ и са библиографским подацима.

Након представљања документа, СА/PL 11/09 који је припремио ЕПО, започета је дискусија уз сугестију председавајућег да се изоставе опште изјаве, а предложене измене коментаришу тачку по тачку.

Прве две тачке правила 71 КЕП-а остале су непромењене, те нису посебно коментарисане.

Тачка 3. која доноси промене у делу да Одсек за испитивање може предложити измене, изазвала је коментаре, који се пре свега односе на то да није дефинисано шта ће се десити уколико подносилац пријаве не прихвати овај предлог као и да није прописано да Одсек за испитивање мора аргументовати свој предлог. Такође, нејасно је које врсте измена могу бити препоручене, нити на који начин ће те измене бити усаглашене са пословним потребама подносиоца пријаве. Примедбе су дате и на дужину текста целокупног правила.

Тачке 4. и 5. новог правила 71. КЕП-а регулишу ситуације у којој подносилац пријаве достави измене или исправке грешке у последњој фази, уместо сагласности. Коментари учесника комитета односили су се пре свега на постављене рокове и јасноћу текста (посебно израз "reasoned statement") Највећи део примедби на тачке 6. и 7. односио се на начин на који су ове тачке написане. Истакнуто је да је суштина јасна али и да се она могла исказати на једноставнији начин.

Тачке 8, 9 и 10. остале су непромењене

Тачка 11. уноси промену везану за библиографске податке.

Тачка 12. је потпуно нова и односи се на рефундирање такси.

На крају расправе по овој тачки дневног реда констатовано је да Комитет није у позицији да изнесе мишљење у овој фази. Оно што се може приметити је жеља ЕПО-а да узме у обзир све коментаре,

ревидира свој предлог и поново га изнесе на расправу на следећем састанку Комитета.

4. Процеурална ефикасност и подизање квалитета подржавају стратегију Европског патентног завода која се односи на одрживо финансирање и реформу такси. Висок квалитет рада у поступку испитивања може смањити број опозиција или жалбених поступака и тако смањити укупне трошкове. Документ СА/162/9 садржи приказ иницијатива које су фокусиране на повећање квалитета и ефикасности у свим поступцима Одсека за испитивање. Овај документ већ је представљен на Административном савету и пред буџетском комисијом, а Комитету је дат као информација. Све акције могу се сврстити у две групе: Имплементиране акције и Будуће акције.

У прву групу спадају:

- измене у правилнику (правило 62 КЕП-а, чланови 16-18 КЕП-а, група правила која би требало да ступе на снагу 01.04.2010 и које се у овом тренутку имплементирају у систем ЕПО и упутства за испитивање)
- промене у пракси рада ЕПО и унутрашње мере (инвентивни ниво - строжија дефиниција просечног стручњака и проблем-решење приступа, поступак усмене расправе, упутства за испитивање проналазака која имплементирају рачунаре, база података са правним информацијама).

Другу групу чине идеје за могући напредак, чија се конкретизација очекује у блиској будућности (увођење приручника за најбоље деловање, оцена испитивања додатних патентних захтева, правила која се односе на примедбе трећих лица и дозвољене измене ...)

У напред поменутом документу дат је и табеларни приказ извршених и планираних измена са анализом њиховог дејства посматрано кроз квалитет, ефикасност и време.

5. Европски патентни завод известио је све учеснике Комитета да је у јулу 2009. године Индустијска Трилатерала (Business Europe, Japan Intellectual Property Association, Intellectual Property Owners Association и American Intellectual Property Law Association) послала водећим светским заводима, WIPO-у и групи Б захтев за наставак преговора о хармонизацији патентног закона унутар Сталног Патентног Комитета у оквиру WIPO и групе Б+. Индустијска Трилатерала захтева хармонизацију по следећим тачкама:

- систем првог подношења,

- међународни грејс период који ће обезбедити сигурност подносиоцу пријаве од ненамерног откривања проналаска,
- униформни стандард времена за објаву пријава,
- дефиниција стања технике без географских ограничења.

Сва ова питања захтевају се у циљу поједностављења процедуре за подносиоце пријава и редукцију трошкова, али и обезбеђивање ефикасне сарадње између завода.

Након представника ЕПО-а који су представили документ CA/PL/3/10, у коме је дат детаљан приказ онога што је до сада учињено, и представник Данске, у име радне групе 1 - групе Б, представио је рад ове групе. Најављен је састанак радне групе у току 2010. године, а тренутно се воде неформалне консултације, мада још увек нема информација о напретку преговора са представницима Америке. Делегација WIPO-а се укратко осврнула на последњи 14. састанак Сталног Комитета за патентно право, напомињући да је по свим темама (раније одабраним) вођена општа дебата, и да су све теме остале отворене и за наредни састанак. Студија о изузећу од патентбилности дата је експертима ван WIPO-а на анализу. Такође, напоменуто је да је делегација Бразила предложила конкретне акције тј. радни програм који би се састојао из три фазе и који би обухватио приручник који би могле да користе све земље као неку врсту упутства. С обзиром да је овај предлог стигао непосредно пре почетка састанка, о њему ће се разговарати на следећем Комитету у октобру.

Закључак Комитета по овој тачки дневног реда је да постоји сагласност да документ представља добар преглед развоја досадашње хармонизације патентних закона. У коментарима учесника констатовано је да је хармонизација важна и за индустрију и за Заводе, али је такође истакнуто да не треба форсирати хармонизацију по сваку цену. Европа је већ начинила корак напред и ниједна делегација у овој фази није спремна на даље уступке.

Већина делегација остала је при својим ставовима сумираним у документу CA/PL/4/07 из 2007.године. ЕПО се захвалио на свим коментарима и најавио састанак са Индустријском Трилатералом, у Вашингтону током ове године на коме ће заједно са JPO и USPTO изнети своје мишљење.

6. Разно

6.1. Прва тачка овог дела агенде односила се на плаћање такси за одржавање у националним заводима, за европске патенте, након одлуке Великог Жалбеног већа. Наиме ЕПО је позвао све чланице да пре састанка доставе информације о начину на који је плаћање такси регулисано националним законима у случајевима у којима се након поништаја патента од стране Жалбеног Већа, та одлука промени на Великом Жалбеном већу на основу члана 112а КЕП-а и патент врати у важност. Овде се намеће питање како надокнадити таксе за одржавање које су пропуштене за период док патент није био у важности. Представник ЕПО-а известио је да је 17 делегација одговорило на њихов захтев, а само 8 земаља има неки вид решења за ову ситуацију. Председник комитета замолио је и остале делегације да доставе свој став по овом питању и указао је да је, иако нема много оваквих случајева, неопходно пронаћи решења на националним нивоима.

6.2. Делегација Белгије информисала је Комитет о свом најновијем пројекту. Наиме, суочен са многим питањима од стране својих компанија о правима интелектуалне својине у Кини, овај Завод је одлучио да, уз подршку Европске комисије, отвори "help desk" у Пекингу. Представник Белгије нагласио је да овај пројекат представља улагање у даљи дијалог са Кином.

6.3. Договорено је да се следећи састанак одржи крајем маја (тачан датум биће касније утврђен). Састанак ће трајати један дан, а главна тачка биће измена правила 71 КЕП.

ЧЕТРНАЕСТО ЗАСЕДАЊЕ СТАЛНОГ КОМИТЕТА ЗА ПАТЕНТНО ПРАВО- WIPO

Женева, 25 – 29. јануар 2010. године

ИЗВЕШТАЈ*Зорана Зрнић-Вукојевић*, патентни испитивач у Одељењу за хемију и хемијску технологију*Александра Михаиловић*, млађи саветник у Одсеку за правна питања патената

У периоду од 25 - 29.01.2010. године одржано је 14. заседање Сталног комитета за патентно право (SCP) у седишту Светске организације за интелектуалну својину (WIPO) у Женеви.

Своје представнике имале су 102 земље чланице WIPO-а, као и 8 међувладиних организација и 26 невладиних организација.

Делегацију Републике Србије представљале су Весна Филиповић-Николић, саветник Републике Србије у Сталној Мисији при Уједињеним Нацијама, Зорана Зрнић-Вукојевић, патентни испитивач у Одељењу за хемију и хемијску технологију и Александра Михаиловић, млађи саветник у Одсеку за правна питања патената.

Састанак је отворио генерални директор WIPO, господин Френсис Гари, који је пожелео добродошлицу свим учесницима и одржао кратак уводни говор. За председавајућег је једногласно изабран господин Максимилијано Санта Круз, представник Сталне мисије Чилеа при УН. Након усвајања дневног реда четрнаестог заседања SCP, усвојен је нацрт извештаја са тринаестог заседања SCP, са изменама које су примљене од делегације Јапана и представника међународних организација ALIFAR и CEIPI, које ће бити обухваћане коначним извештајем.

Главне тачке дневног реда су биле:

- 1) Стандарди и патенти (Standards and Patents).
- 2) Изузећа од патентбилности и ограничење права (Exclusions from Patentable Subject Matter and Exceptions and Limitations to the Rights).
- 3) Поверљивост комуникације клијент-патентни заступник (The Client-Patent Advisor privilege)
- 4) Дисеминација патентних информација (Dissemination of Patent Information).
- 5) Трансфер технологије (Transfer of Technology)
- 6) Систем опозиције (Opposition Systems).

Дискусија је била базирана на прелиминарним студијама које је припремио Секретеријат SCP и које су доступне на сајту WIPO-а (SCP/14/2, 3, 4, 5 и http://www.wipo.int/meetings/en/details.jsp?meeting_id=17461)

Већина делегација које су узимале реч похвалиле су прелиминарне студије и истакле да ови документи представљају добру почетну основу за дискусију, за даљу дораду и разјашњење појединих тема које су садржане у овим документима.

1. Поверљивост комуникације клијент-патентни заступник

Прва тема о којој је дискутовано је Поверљивост комуникације клијент-патентни заступник. Ова тема је привукла пажњу већине присутних делегација, а посебно невладине организације AIPPI (International Association for the Protection of Intellectual Property), која је организовала посебан састанак посвећен овој теми. Ова тема је у упоредном патентном праву нарочито занимљива због великих разлика у третману патентних заступника. Најзначајнија питања која се постављају су следећа:

- 1) Да ли поверљивост комуникације клијент-патентни заступник утиче на квалитет савета и на начин примене судске власти?
- 2) Да ли је и патентним заступницима, који нису правници, потребно дати исти третман када се ради о поверљивости комуникације клијент-патентни заступник?
- 3) Да ли патентни заступници, који заступају клијенте пред патентним заводима и припремају документа за подношење, заслужују да буду обухваћени привилегијом поверљивости информација?
- 4) Да ли привилегија клијент-патентни заступник утиче на правну сигурност на међународном нивоу због различитог третмана страних заступника?

Да би патенти заступник своме клијенту пружио адекватне савете, клијент мора да му открије све релевантене информације које се тичу проналаска. Из разлога правне сигурности информације изречене приликом давања савета заступника клијенту морају бити законом заштићене, а све због злоупотребе изречених информација.

Разлика између земаља које користе *common-law* правни систем и *civil law* правни систем потиче од разлике на који начин судови обезбеђују доказе у

судским споровима. У земљама које користе *common-law* правни систем, свака страна судског спора дужна је да на захтев суда открије информације које могу бити релевантне за спор. Изузетак од овог правила су информације које су изречене између клијента и његовог правног заступника и овај изузетак се зове „привилегија“. Откривање информација које су изречене између клијента и правног заступника би обесхрабрило клијента да потражи правне савете. Међутим „привилегија“ се углавном признаје само уколико се ради о правним саветима, а не и о техничким, што је у патентном праву врло често.

У земљама које користе *civil law* правни систем клијенти су заштићени институтом који се назива „професионална тајна“. У категорију професија на коју се примењује овај институт спадају и патентни заступници. Овим институтом су клијенти заштићени од тога да њихов правни заступник открије информације које су му поверене. Потреба да клијент открије свом патентном заступнику све информације постоји у циљу да добије најбоље могуће савете. Међутим, у патентном праву, ситуација је веома компликована из разлога што за лица која су патентни заступници нису исти услови у свим земљама.

Посебан изузетак у оба правна система представљају подаци који се односе на преварне и незаконите радње. Информације о преварним и незаконитим радњама морају бити откривене на захтев надлежних власти и представљају изузетак и од „привилегије“ и од „професионалне тајне“.

Услови да би неко лице било регистровани патентни заступник веома се разликују у земљама чланицама WIPO. Тако, у неким земљама, патентни заступник може бити лице које није адвокат по професији; у другим земљама мора да има завршен правни факултет и положен посебан стручни испит; у неким земљама је довољно само да се лице региструје као заступник без посебних услова које мора испунити; док се у неким државама захтева да патентни заступници буду технички обучена лица.

Посебан проблем се појављује када су у питању страни патентни заступници. Да ли се признаје поверљивост комуникације када су у питању страни патентни заступници? Одговор на ово питање се такође разликује првенствено од правног система који држава примењује. У земљама које користе *civil law* правни систем обавеза чувања „професионалне тајне“ постоји за домаће патентне заступнике док се за стране заступнике не може примењивати. У земљама које користе *common-law* правни систем, „привилегија“ између патентног заступника и клијента се веома различито третира. Аустралија не третира стране патентне заступнике као и домаће, док United Kingdom даје исти третман европским

патентним заступницима као и домаћим, док осталим заступницима не признаје „привилегију“.

Међународни уговори који се односе на интелектуалну својину не регулишу детаљно питање поверљивости комуникације између клијента и патентног заступника. Париска конвенција, TRIPS споразум и GATT споразум не регулишу директно ово питање већ је остављено државама чланицама да регулишу питање судске процедуре и питање поверљивости комуникације клијент-патентни заступник националним правом, онако како сматрају да је то одговарајуће.

После дискусије присутних делегација предложено је да улога WIPO, када се ради о питању поверљивост комуникације клијент-патентни заступник, буде у доношењу минимума стандарда који ће бити усвојени у свим државама чланицама WIPO. Невладине организације, које су показале нарочито интересовање за ову тему, предложиле су да WIPO припреми предлог за уједначавање праксе земаља чланица који ће се примењивати на питање привилегије клијент-патентни заступник.

2. Изузећа од патентбилности и ограничење права

Изузећа и ограничења права су елементи сваког правног система и предвиђени су да би се очували јавни интереси земље, гарантовала национална безбедност и обликовала јавна политика као и технолошки развој, право конкуренције и циљеви јавног здравља.

Париска конвенција о заштити индустријске својине, не регулише питање изузетака и ограничења права, већ то оставља уговорним странама да уреде својим националним прописима. TRIPS споразум садржи детаљније одредбе које прописују поступак који се састоји из три корака ради дефинисања питања које се односи на прихватљива ограничења ексклузивних патентних права. Сходно члану 30 TRIPS, изузеци у патентном праву: а) не смеју ометати уобичајено располагање патентом, б) не смеју наштетити правним интересима власника патента, ц) морају узети у обзир легитимне интересе треће стране. У члану 31. TRIPS регулише се располагање патентом без дозволе титулара права. Међутим, у члану 73. TRIPS споразума признаје се слобода сваке земље чланице да предузме потребне мере које сматра неопходним за заштиту својих интереса.

Ипак, на националном и регионалном нивоу упоредном анализом се показало да се ексклузивно право на патент не може применити на ситуације као што су: приватна употреба у некомерцијалне сврхе, употреба за сврху подучавања, научна истраживања и употреба у експерименталне сврхе, припрема лека према лекарском рецепту, добијање регулаторних

дозвола за фармацеутске компаније, употреба од стране ранијег корисника и принудна лиценца.

Делегација Бразила је изнела свој предлог да SCP припреми студију о изузецима и ограничењима у три фазе. У предлогу је, поред осталог, указано на изузетну важност функционисања одредаба о ограничењима и изузецима на националном и регионалном нивоу, као и изражавања забринутости по питању веома ограничене употребе одредаба о изузецима и ограничењима од стране развијених земаља.

У првој фази би се на националном и регионалном нивоу размениле детаљне информације о законским одредбама које се тичу изузетака и ограничења, као и искуства у примени наведених одредаба. У овој фази би требало, такође, обратити пажњу на то како државе користе или схватају могућност коришћења изузетака и ограничења који су прописани њиховим законима.

У другој фази би требало истражити који изузеци и ограничења утичу на развој појединих земаља и који су услови за њихову примену. Такође, у овој фази је битно утврдити како национални капацитети могу да се носе са изузецима и ограничењима.

У трећој фази би се размотрила студија о изузецима и ограничењима и она би служила WIPO чланицама као препорука за прописивање и примену одредаба о изузецима и ограничењима.

Овај предлог је наишао на велику подршку SCP али су многе делегације изразиле бригу из разлога што документ нису примиле на време и нису имале довољно времена да размотре предлог. Већина делегација изразила је жељу да се овај предлог разматра на следећем заседању SCP, што је и усвојено.

3. Стандарди и патенти

Стандарди су есенцијални за широку примену нових технологија на тржишту. Потенцијални конфликт између патената и стандарда се јавља када примена неопходних стандарда користи технологију заштићену са једним или више патената. Мада су циљеви тела за успостављање стандарда (standard setting body- SSB) као и компанија које у томе учествују, успостављање стандардизоване технологије која може бити коришћена што је шире могуће, носиоци права могу имати комерцијални интерес у примени њихових патентираних технологија у оквиру стандарда, односно могу имати материјалну корист. Према томе, носилац патента може блокирати примену стандарда одбијањем лиценце или захтевањем нереално високе новчане надокнаде, што би било супротно циљу поступка техничке стандардизације.

У циљу минимизирања овог ризика од конфликта и да би се осигурала мирна и широка дисеминација стандардизоване технологије, већина SSB има установљену сопствену патентну политику. На пример, много SSB-а захтева да стране које су укључене у поступак успостављања стандарда обелодане информације у вези са релевантним патентима (а понекад, такође и патентним пријавама) у циљу њиховог укључивања као релевантних информација у поступак успостављања стандарда. Уколико постоји релевантан патент (или патентна пријава), велики број SSB-а захтева да се носилац патента сложи са специфичним условима лиценцирања, тако да лиценца може бити склопљена под разумним и недискриминаторским условима (reasonable and non-discriminatory - RAND licenca) или да лиценца мора бити без надокнаде (royal free – RF). Међутим, генерално, SSB нису укључени ни у преговоре у вези са патентима (као што су лицензни уговори), нити у поравњања при оспоравању валидности и обима релевантних патената. Као у било ком другом политичком питању, уколико не постоји јасан и недвосмислено дефинисан нацрт патентне политике, различите интерпретације могу бити основ за спор међу учесницима у вези са њиховим обавезама.

Један од начина решавања ситуације у којој различити носиоци патента имају велики број патената који су релевантни за стандарде је успостављање обједињених патената ('patent pool'). Мада ти патенти могу бити различити, типично, ти патенти омогућавају носиоцима патента који су у њега укључени да користе те патенте, да остваре стандардне лиценце за стипендије лиценци који нису чланови заједнице и да се сваком члану заједнице додели део накнаде од лиценцирања према уговору. Уговори о обједињеним патентима могу обезбедити компетитивну корист на пример удруживањем патентираних технологија, уклањањем блокада патента или избегавања потребе за закључивањем вишеструких лиценци. Са друге стране, извесни типови уговора за обједињене патенте, на пример који обухватају патенте који могу заменити друге патенте, могу имати утицаја на њихову конкуренцију.

4. Опозиција

Многе земље у свом патентном систему имају механизме опозиције. Систем опозиције даје трећој страни могућност да уложи приговор на признати патент у одређеном временском периоду што је регулисано важећим законом. Опонент мора навести најмање један разлог за опозицију, од оних које прописује важећи закон. Поступак опозиције је у блиској вези са поступком за признање патента. Опозиција (приговор) може бити поднета пре

признања патента (pre-grant opposition) или после признања патента (post-grant opposition).

Индија, на пример, спроводи оба поступка, Египат има опозицију пре признања патента, док ЕПО (Европска Патентна Организација) и ЕАО (Евроазијска Патентна Организација) спровode опозицију само после признања патента. Један од главних циљева система опозиције је да обезбеди једноставан, брз и јефтин механизам који обезбеђује квалитет и валидност признатих патената омогућавајући рану исправку неважећих патената.

Опозиција пре признања патента (pre-grant opposition) често почиње када је испитивање патентне пријаве комплетно и са позитивним резултатом. Завод објављује намеру о признању патента према захтевима садржаним у пријави и обезбеђује одређен временски период у коме приговор може бити поднет. Опонент износи разлоге за опозицију и прилаже неки доказ. Уколико, у одговарајућем временском периоду, није поднета опозиција патент ће бити признат, у супротном, подносилац пријаве ће бити обавештен о опозицији са разлозима и доказима за исту. Подносилац пријаве има могућност увида у комплетан материјал у вези опозиције и може да да своје образложење, затим опонент има могућност одговора на примедбе (образложење) подносиоца пријаве. На основу поднесака опонента и подносиоца пријаве, испитивач или нека друга особа којој је поверено да одлучи о опозицији, у складу са важећим законом, ће донети одлуку да ли ће патент бити признат или не.

Опозиција после признања патента (post-grant opposition), када је патент признат и објављен опозиција може бити поднета са чињеницама у законом предвиђеном року. Као и у поступку опозиције пре признања патента, носилац патента се обавештава о приговору и чињеницама наведеним у

приговору, добија могућност увида у материјал поднет од стране опонента, износи своје мишљење, такође, опонент има увид у тај материјал, све у законом предвиђеном временском периоду. На основу свих изнетих података од стране опонента и носиоца патента, за доношење одлука у случају опозиције предвиђене важећим законом, доноси се одлука да ли ће патент остати у важењу или се поништава.

Један од циљева система опозиције је да се спроведе једноставан механизам који обезбеђује квалитет и валидност признатих патената. Према многим националним законима, било која страна, укључујући и подносиоца пријаве или носиоца патента, може поднети приговор. Ипак, неки закони одређују да било која трећа страна (изузети су подносилац пријаве или носилац патента) може поднети приговор. У многим земљама је потребно платити таксу за подношење приговора.

На крајњу одлуку опозиционог тела могуће је поднети жалбу, углавном суду.

О предложеним темама дисеминација патентних информација и трансфер технологије није дискутовано на овом заседању, већ је то одложено за следеће заседање.

Након пет дана дискусије о предложеним темама како на састанцима SCP, тако и у радним групама све делегације су се сложиле да се теме са овог заседања разматрају на следећем заседању SCP које ће се одржати од 11. – 15. октобра 2010. године. Као основа за дискусију ће послужити материјали са 14. Седнице. Такође, је истакнуто да ће се на наредном заседању узети у обзир предлози појединих делегација, који су изложени на овој Седници, а који су изузетно значајни за развој патентног права, као и за даљи рад SCP.

ШЕСНАЕСТО ЗАСЕДАЊЕ МЕЂУВЛАДИНОГ КОМИТЕТА ЗА ИНТЕЛЕКТУАЛНУ СВОЈИНУ И ГЕНЕТСКЕ РЕСУРСЕ, ТРАДИЦИОНАЛНО ЗНАЊЕ И ФОЛКЛОР-WIPO

Састанак се одвијао према усвојеном дневном реду. Председавајући састанка је био Филип Ричард О. Оваде, амбасадор Кеније у Сталној мисији при УН у Женеви. Координатор ЦЕБС групе, чији је члан и Република Србија, је био Грег Кумер, трећи

секретар Сталне мисије Словеније при УН у Женеви. Након отварања и акредитације посматрача, усвојен је нацрт извештаја са петнаестог састанка Комитета. На основу докумената WIPO/GRTKF/IC/16/4, WIPO/GRTKF/IC/16/5 и WIPO/GRTKF/IC/16/6, које је Секретаријат припремио као радна документа за овај састанак, дискутоване су следеће теме: 1) Заштита традиционалног културног израза / изражавања фолклора, 2) Заштита традиционалног знања и 3) Генетски ресурси.

Током првог дана заседања, изабрана су два потпредседника Комитета: г-дин Хозе Рамон Лопез де Леон Ибара, други секретар амбасаде Мексика у Сталној мисији при УН, и г-дин Владимир Јосифов, саветник у Сталној мисији Бугарске при УН у Женеви. Избор г-дина Јосифова на место потпредседника је у групи ЦЕБС прихваћено са великим задовољством, с обзиром да је Бугарска чланица ове групе и да г-дин Јосифов ужива велики углед код свих представника земаља чланица WIPO. Поред овога, на предлог председавајућег Комитета, г-дина Оваде, г-дин Јосифов је изабран и за председавајућег Саветодавног одбора Добровољног фонда за финансирање учешћа домородачких и локалних заједница.

**Заштита традиционалног културног изражавања / изражавања фолклора;
Традиционално знање**

Документи: WIPO/GRTKF/IC/16/4, који се односи на заштиту традиционалног културног изражавања (ТКИ), и WIPO/GRTKF/IC/16/5, који се односи на заштиту традиционалног знања, припремљени су у виду ревидираних радних докумената WIPO/GRTKF/IC/9/4 и WIPO/GRTKF/IC/9/5, у којима се даје преглед предлога за дефинисање циљева, општих водећих принципа и материјалних одредби у датим областима. У циљеве су, између осталог, сврстани: јачање локалних заједница, очување традиционалних култура, спречавање проневере и злоупотребе ТКИ, допринос културној различитости, промоција развоја домородачких народа и заједница и традиционалних и других заједница, промоција легитимних трговинских активности, искључење неауторизованих ИС права, јачање сигурности, транспарентности и узајамног поверења. Као општи

водећи принципи наведени су: одговарање на тежње и очекивања релевантних заједница, равнотежа, поштовање и усаглашеност са међународним и регионалним уговорима, флексибилност и свеобухватност, поштовање права и обавеза према домородачким народима и заједницама и традиционалним и другим заједницама, комплементарност са заштитом традиционалног знања, поштовање уобичајене употребе и преношења ТКИ, ефикасност и доступност мера заштите. Материјалне одредбе се односе на: предмет заштите; носиоце права (корисници); дела проневере и злоупотребе (обим заштите); управљање правима; изузећа и ограничења; трајање заштите; формалности; санкције, лекове и остваривање права; прелазне одредбе; однос са заштитом интелектуалне својине и другим облицима заштите; очување и промоција; међународна и регионална заштита.

У циљу проналажења најбољих дефиниција за одредбе које су наведене у документима, делегације су давале предлоге за измене и допуне постојећих формулација. Делегација САД је предложила да се у одредбама у којима се наводе носиоци права као „домородачки народи и заједнице и традиционалне и друге заједнице“ користи израз „релевантне заједнице“ као свеобухватан израз. Овај и други предлози ће бити унети у наредне ревидиране документе које ће Секретаријат припремити за 17. састанак Комитета. Представници *TULALIP TRIBES* организације су изнели став да је првенствено неопходно дефинисати термин *јавни домен* (*public domain*) и сагледати последице тога што ће неко традиционално знање или традиционално културно изражавање постати доступно јавности, тј. ући у јавни домен. Као представници америчких домородачких племена, они су забринути за опстанак традиционалног знања у традиционалном контексту, јер „јавни домен данас чини 7 милијарди људи, док домородачки народи броје око 20 милиона“. Такође су искористили прилику да похвале Нови Зеланд за третман домородачких заједница које живе на територији ове земље. С друге стране, делегација Норвешке је мишљења да стављање традиционалног знања на увид јавности не значи да је неко изгубио право на њега, већ да је то најсличније *open source* пракси у различитим областима технолошког знања и ауторских права. Делегација Нигерије је подсетила на „погрешно“ одобравање патената заснованих на традиционалном знању услед непостојања база те врсте знања, те је објавом таквих патентних пријава традиционално знање већ постало доступно јавности.

Афричка регионална организација за интелектуалну својину (АРИПО) је доставила Секретаријату нацрт *Протокола о заштити традиционалног знања и изражавања фолклора* као документ WIPO/GRTKF/IC/16/INF/24. Протокол би

требало да буде легални инструмент у сврху заштите власника традиционалног знања од повреде њихових права каква су препозната и дефинисана овим документом и у сврху заштите изражавања фолклора од проневере, злоупотребе и експлоатације ван њиховог традиционалног контекста. Према дефиницији датој у одељку 2 овог Протокола, *изражавање фолклора* су сви облици, опипљиви и неопипљиви, у којима се традиционална култура и знање изражавају, појављују или манифестују, и обухватају следеће облике изражавања или њихове комбинације: i) вербално изражавање, као што су, али не ограничено на овде наведено, приче, епови, легенде, поезија, загонетке и друга приповедања; речи, знаци, имена и симболи; ii) музички изрази, као што су, али не ограничено на овде наведено, песме и инструментална музика; iii) израз покретом, као што су, али не ограничено на овде наведено, плес, игра, ритуали и други перформанси; сведено или не на материјалну форму; и iv) опипљиви изрази, као што су производи уметности, посебно цртежи, дизајн, слике (укључујући сликање по телу (*body-painting*)), резбарија, скулптуре, грнчарија, теракота, мозаик, дрвенарија, метална роба, накит, кошаре, вез, текстил, стакларија, теписи, костими; рукотворине; музички инструменти; архитектонске форме. *Традиционално знање* је дефинисано као свако знање које потиче од локалне или традиционалне заједнице које је резултат интелектуалне активности, а у оквиру традиционалног контекста, укључујући *know-how*, вештине, иновације, праксу и учење, где је знање оличено у традиционалном начину живљења заједнице или садржано у кодификованом систему знања које се преноси са једне генерације на другу. Израз *традиционално знање* није ограничен на специфично техничко поље и може да укључује пољопривреду, медицинска знања и знања о животној средини и знања повезана са генетским ресурсима. Да би традиционално знање испуњавало услов за заштиту према Протоколу, оно мора да је интегрални део културног идентитета локалне или традиционалне заједнице, којој се признаје да је носилац тог знања, кроз старање о том знању, његово чување или колективно и културно власништво или одговорност. Такав однос може бити успостављен формално или неформално, кроз уобичајену праксу, законе или протоколе. Заштита традиционалног знања неће бити предмет било каквих формалности. У циљу транспарентности, доказивања и очувања традиционалног знања, компетентна институција може да води регистре или друге видове бележења знања, али тако да не угрожава статус досад неоткривених традиционалних знања и њихових носилаца. Власници права на заштиту традиционалног знања ће имати ексклузивно право да ауторизују експлоатацију њиховог традиционалног знања, као и да спрече свакога ко нема њихову дозволу (*Prior Informed Consent (PIC)*)

да комерцијално искоришћава њихово традиционално знање. Дозвола (PIC) се дефинише као давање од потенцијалног корисника потпуне и тачне информације и, засновано на тој информацији, претходно прихватање од стране дотичне заједнице да (потенцијални корисник) користи њихово традиционално знање или израз фолклора. У одељку 8 се предвиђа могућност да власници традиционалног знања закључују уговоре о лиценцирању. Сваки приступ, ауторизација или дозвола морају бити одобрени у писаној форми или неће имати правну снагу или ефекат. Документ написан у поменуте сврхе ће бити одобрен од стране овлашћене институције и регистрован у Заводу АРИПО, а у супротном се неће сматрати важећим. У оквиру права на заштиту традиционалног знања је укључено и право на поштену и праведну поделу накнаде од комерцијалне или индустријске употребе између власника тог знања и овлашћеног корисника, што се одређује уговором између страна. У одсуству таквог уговора, компетентна институција може одредити праведну расподелу добити. Право на накнаду може бити и не-новчана накнада, као што је допринос развоју заједнице, а у зависности од материјалних потреба и културних приоритета дотичне заједнице. У одељку 15 стоји да ауторизација за приступ традиционалном знању повезаном са генетским ресурсима не подразумева дозволу за приступ том генетском ресурсу изведеном из традиционалног знања. Што се тиче критеријума за заштиту израза фолклора, заштита ће се односити на било који облик изражавања који је: а) производ креативних и кумулативних интелектуалних активности, као што су колективно стваралаштво или индивидуално стваралаштво, где идентитет ствараоца није познат; и б) карактеристика културног идентитета и традиционалног наслеђа заједнице, а одржавано, коришћено и развијано од стране те заједнице, у сагласности са обичајним законима и праксом те заједнице. По аналогiji са традиционалним знањем, заштита израза фолклора се огледа у праву релевантне заједнице да спречи свакога, ко нема њихову дозволу (PIC), да спроводи разне активности, везано за њихов културни израз / фолклор.

Генетски ресурси

Расправа о генетским ресурсима (ГР) и са њима повезаним традиционалним знањем заснивала се на документу WIPO/GRTKF/IC/16/6, који садржи опције из документа WIPO/GRTKF/IC/11/8(a) подељене у три кластера: 1. Опције за одбрамбену заштиту (defensive protection) генетских ресурса; 2. Опције за захтев за откривање (disclosure requirements) порекла ГР и 3. Опције за питања интелектуалне својине о споразумно договореним условима за поштену и равноправну расподелу добити (benefit-sharing). У први кластер су убројане

следеће опције: а) попис база података и извора информација о ГР – предлаже се да Комитет припреми попис постојеће периодике, база података и других извора информација у којима су документовани откривени генетски ресурси, као и да се дају препоруке о изворима информација са те листе који треба да буду интегрисани у ПЦТ листу минимума документације, а која треба да се користи за израду извештаја о стању технике; б) информациони систем за ГР за одбрамбену заштиту – предлог за успостављање новог „one-stop“ система, тј. направити такав информациони систем којим ће се омогућити приступ свим релевантним базама података о ГР са једног места, уместо претраге по националним базама одвојено; ова опција захтева додатно финансирање; в) водич и препоруке за одбрамбену заштиту – подразумева препоруке за процедуру претраживања стања технике и испитивања патентних пријава како би се спроводило квалитетније испитивање пријава које откривају генетске ресурсе. Други кластер обухвата: а) обавезу откривања порекла ГР, б) друга питања која се односе на захтев за откривање порекла ГР – Комитет би требало да размотри да ли постоји потреба да се припреме одговарајуће (модел) одредбе за националне и регионалне законе о патентима, или друге законе који би олакшали доследност и синергију између мера за обезбеђење приступа генетском ресурсу и поделе добити од његовог коришћења (ABS (access and benefit-sharing)) с једне стране, и националних и међународних закона о интелектуалној својини и праксе, с друге стране; и в) водич и препоруке за откривање порекла ГР – требало би да се дају предлози у погледу повезаности између откривања порекла ГР у патенту и приступа генетском ресурсу и поделе добити од његовог коришћења, в) алтернативни механизми – друге активности у циљу спречавања погрешног одобравања патената за проналаске који укључују ГР. У трећем кластеру су: интернет базе клаузула за услове за ABS, чији би садржај могао бити и публикован на CD-ROM-у ради лакше употребе и приступачности свим релевантним заинтересованим странама; нацрт водича за праксу уговарања; студија праксе лиценцирања за ГР, по могућству у форми студије случајева, а засновано на искуству глобалне јавне лиценце и других сличних искустава из поља ауторских права.

Секретаријат је подсетио на студију случаја биопиратерије из искуства Перуа, који се односи на неколико америчких патената одобрених за употребу биљке *Lepidium meyenii* која се узгаја на Андима, а коју перуански домороци користе већ више векова. У циљу решавања проблема одобравања патената за проналаске засноване на употреби биолошког материјала, а чија је употреба повезана са традиционалним знањем и употребом тог материјала,

требало би омогућити патентним испитивачима лакше претраживање информација о откривеним гентским ресурсима. Са друге стране, у документу који су поднеле BIO (Biotechnology Industry Organisation) и IFPMA (International Federation of Pharmaceutical Manufacturers and Associations) истакнут је проблем „навodne биопиратерије“ која је последица недовољно јасне националне политике и процедуре за добијање дозвола за приступ гентском ресурсу и поделу добити од његове комерцијалне употребе. Као пример је изнет случај компаније *Eli Lilly and Company* (Lilly) која је 2007. године покушала да добије дозволу за коришћење биљног материјала из Камеруна. Један камерунски истраживач је регистрован код Камерунског завода за хербаријум као „једини власник“ биљног материјала за који је Lilly заинтересована. Lilly је контактирала неколико институција у Камеруну и од сваке добила другачији одговор о томе које дозволе треба да обезбеди и колика би накнада требало да буде. Случај се завршио годину дана касније одустајањем ове компаније од пројекта због неусклађене националне регулативе Камеруна по питању експлоатације биолошког материјала. Ово показује да би *Међународни режим за приступ и поделу добити* (*International Regime on Access and Benefit-sharing*), о којем се тренутно расправља на Конвенцији о биолошком диверзитету (CBD), могао да буде од велике помоћи националним властима да разјасне аспекте свог ABS режима. У супротном, потенцијалне могућности за партнерство између истраживача и малих компанија у земаљама у развоју, с једне стране, и великих компанија, с друге стране, неће се остварити услед проблема приликом преговарања који су последица нејасне правне регулативе.

У погледу обавезе откривања порекла или извора генетског ресурса у патентној пријави, различите земље имају различит став. Швајцарска је дала предлог да се у РСТ регулативу унесу измене које би омогућиле националним законодавцима да уведу захтев за откривање информација о генетском ресурсу у патентној пријави. Ова земља даље предлаже да се постави интернет листа владиних агенција које би биле компетентне да примају информације о патентним пријавама које садрже изјаву о пореклу генетског ресурса. Треба нагласити да изјава може да садржи пуну информацију о пореклу и извору генетског ресурса или да се састоји од изјаве пријавиоца да му нису познати порекло или извор коришћеног биолошког материјала, уколико је то стварно случај. Швајцарска је у свој Закон о патентима имплементирала „захтев за откривање“, који је на снази од 1. јула 2008. године, а у складу са својим предлогом за измене у РСТ регулативи. Овај захтев се примењује како на националне, тако и на међународне патентне пријаве у којима је

Швајцарска назначена земља. У случају да пријава не садржи изјаву о генетском ресурсу, пријавиоцу се одобрава рок за отклањање овог недостатка. Уколико се у одобреном року не достави тражена изјава, швајцарски Федерални институт за интелектуалну својину ће одбити такву пријаву. За намерно дату погрешну изјаву у којој се наводи другачији извор биолошког материјала од правог или у којој се изјављује да је извор непознат, иако подносилац има потребну информацију, прописана је казна до 100 000 CHF.

Поред Швајцарске, а у циљу имплементације рецитала 27 европске Директиве 98/44 („Биодиректива“), Белгија и Данска су увеле „обавезу откривања“ у своје законе о патентима, али без утицаја на исход одобравања патента или спровођења права из њега. Према законима Немачке и Шведске, патентне пријаве за проналаске који су базирани на биљном или животињском материјалу требало би да садрже информацију о географском пореклу таквог материјала уколико је познат подносиоцу. Остале земље Европске Уније нису до сада ускладили своје законе са препоруком из рецитала 27 „Биодирективе“.

Према ставу Швајцарске, свака земља ће имати свој приступ овом питању све док се у РСТ регулативу не унесу измене према којима ће се националне политике усагласити. Кључно је да се има у виду да захтев за откривање информација о генетском ресурсу није сам по себи решење свих питања у погледу „приступа и расподеле добити“. Неопходно је увести додатне елементе у глобалном приступу решавања питања права на приступ генетском ресурсу и праведне расподеле добити од његове експлоатације, а то се може постићи мерама које би биле хармонизоване и међусобно подржане релевантним међународним инструментима, укључујући одлуке које ће бити усвојене на Конвенцији о биолошком диверзитету.

Закључак

С обзиром на велики број питања и различитих ставова у погледу традиционалног културног изражавања, традиционалног знања и генетских ресурса, на овом састанку Комитета је усвојен документ који дефинише рад три међусесијске радне групе (IWGs) које ће посебно расправљати о свакој од наведених тема. IWGs треба да олакшају и подрже преговоре у оквиру Комитета. Договорен је број експерата за сваку групу земаља за које ће бити обезбеђено финансирање пута и боравка у току трајања рада IWG од стране WIPO. Тако, за 71 земљу у развоју и земље са пеивредом у транзицији, одређено је да, на основу пропорционалности, Африка добије 25, Азија-Пацифик 17, Латинска Америка и Кариби 15, Централна Европа и Балтик 8, Источна Европа и Централна Азија 5 и Кина једно

место. Прва IWG ће се одржати у периоду 19-23. јула 2010. године у седишту WIPO, на тему „Заштита традиционалног културног израза / изражавање фолклора“, за коју ће Секретаријат припремити радна документа до 19. јуна ове године. За преостале две радне групе, термини ће бити накнадно одређени после седамнаестог заседања Комитета.

Председавајући је позвао учеснике да поднесу писане коментаре на документ WIPO/GRTKF/IC/16/7 пре 31. јула 2010. године. Секретаријат ће уврстити достављене коментаре у текст документа који ће бити радни документ на следећем састанку Комитета.

**ДВАДЕСЕТПРВА СЕДНИЦА РЕВИЗИОНЕ РАДНЕ ГРУПЕ ЗА
МЕЋУНАРОДНУ КЛАСИФИКАЦИЈУ ПАТЕНАТА****Женева, 15 – 19. јун 2009. године****ИЗВЕШТАЈ****Марија Радосављевић**, шеф Одсека за дисеминацију информација**Милан Миљевић**, саветник у Одељењу за машинство, електротехнику и општу технику Сектора за патенте**1. Учесници, разлог путовања**

Двадесетпрва седница Ревизионе радне групе за Међународну класификацију патената (IPC Revision Working Group, Nineteenth Session) одржана је од 15. - 19. јуна 2009. године у Женеви, у седишту Светске организације за заштиту интелектуалне својине (WIPO).

Задатак Двадесетпрве седнице Ревизионе радне групе за Међународну класификацију патената (МКП) односио се на усаглашавање и дискусију претходно предложених измена и допуна (на ранијим седницама). Разматран је, прегледан и усаглашен читав низ ревизионих пројеката основног нивоа МКП-а (IPC Core Level Revision projects) из области машинства, хемије и електротехнике. Такође, прегледан је и усаглашен одређен број ткз. МКП „Д“ програма (definition programs) као и МКП „М“ програма (maintenance programs).

Рад се током Седнице одвијао кроз динамичну дискусију великог броја представника земаља чланица.

У раду Седнице учествовали су представници следећих земаља – чланица и то из: Бразила, Канаде, Кине, Финске, Француске, Немачке, Израела, Мексика, Јапана, Норвешке, Пољске, Португала, Републике Кореје, Румуније, Руске Федерације, Шпаније, Шведске, Швајцарске, Велике Британије, Сједињених Америчких Држава, Афричке регионалне организације за интелектуалну својину (АРИПО) и Европског патентног завода (ЕПО). Представници Украјине и Републике Србије учествовали су у својству посматрача. Делегацију Завода за интелектуалну својину представљали су Марија Радосављевић, дипл. инж. техн., шеф Одсека за дисеминацију информација и Милан Миљевић, дипл. инж. маш., саветник у Одсеку за машинство, електротехнику и општу технику Сектора за патенте.

2. Општи ток седнице

Седницу је отворио господин А. Farassopoulos, начелник службе за Класификацију и Међународне стандарде патената. За 2009. годину, Радна група је једногласно поново изабрала за председника г-дина F. Brady-ја из Ирске, а за потпредседника г-дина T. Mackey-а из Сједињених Америчких Држава. Г-дин L. Mailänder (WIPO) је изабран за секретара седнице.

Након тога Радна група је једногласно усвојила дневни ред, који је дат у наставку.

4. Извештај са четрдесетпрвог заседања МКП Комитета експерата; Извештај са седмог заседања Подкомитета за напредни ниво МКП-а

Секретаријат је усмено известио присутне о закључцима четрдесетпрвог заседања МКП Комитета експерата - (у даљем тексту означеног као „Комитет“, видети документ IPC/CE/41/6), као и о закључцима са седмог заседања Подкомитета за напредни ниво МКП-а (у даљем тексту означеног као „ALS“, видети документ IPC/ALS/7/9).

Иако су током Седнице Радне Групе изнети само најбитнији закључци са напред поменутог заседања, аутори овог извештаја су због значаја материјала (добитог на самој Седници) у даљем тексту дали скраћени приказ извода из докумената (IPC/CE/41/3, IPC/CE/41/6 - ANNEX III) са поменутог четрдесетпрвог заседања МКП Комитета експерата.

Као што је познато, две нове верзије напредног нивоа МКП-а (верзија 2008.04 и 2009.01) ступиле су на снагу 1. априла 2008. године и 1. јануара 2009. године. Такође, 1. јануара 2009. године ступила је на снагу и нова верзија основног нивоа МКП-а.

Комитет експерата је на састанку у WIPO-у, одржаном од 16. - 19. марта 2009. године, донео одлуку да у будућности поједностави процедуру ревизије и публикација МКП-а.

Наиме, на претходној 40-тој седници Комитета експерата, одржаној од 6. - 8. фебруара 2008. године, донета је одлука да се прекине са публикацијом основног нивоа у штампаној форми и да се поновно преиспита комплексност класификације са два нивоа, њихови независни циклуси ревизије и публикација, као и различите процедуре ревидирања, а све у циљу побољшања ефикасности самог процеса ревизије. Разлог за доношење овакве одлуке уследио је након размене искустава (на Радионици организованог од стране WIPO-а) свих корисника МКП-а оба нивоа о примени реформисане МКП током прве две године. Радионици су присуствовали корисници МКП-а из патентних завода, експерти за класификацију из Завода за интелектуалну својину, комерцијални провајдери патентних информација, корисници МКП-а из разних индустријских грана, као и остали експерти за дисеминацију патентних информација.

Један од закључака са ове Радионице је био да формирање основног нивоа није испунило очекивања ни у погледу броја докумената класификованих у оквиру истог, као ни по броју продатих штампаних копија публикација основног нивоа (CL). Са друге стране, подела на основни и напредни ниво са захтевима за њиховим усклађивањем и различитим ревизионим циклусима,

унело је читав низ тешкоћа током процеса ревизије и публикација истих, тако да се није постигла очекивана ефикасност. И том приликом наглашено је да постоји потреба за упростијавањем и синхронизацијом публикација ова два нивоа и коришћењем јединствене ревизионе процедуре. На основу потреба завода који користе основни ниво за класификовање, предложено је и поједностављење поделе између два нивоа класификације.

Комитет експерата је на својој 41. седници одржаној од 16. - 18. марта 2009. године, донео следеће закључке:

После прелазног периода, током календарске 2010. године, МКП структура ће се поједноставити укидањем разлике између основног и напредног нивоа од јануара 2011. године. У будућности би се само један текст МКП-а одржавао и публиковао, и то онај који одговара садашњем напредном нивоу.

Употреба термина као што су „основни ниво” и „напредни ниво” би се укинула, с обзиром да су исти уносили конфузију.

Мали заводи са ограниченим ресурсима или ограниченим искуством у класификовању могу класификовати своје документе или до нивоа поткласе (као што је предвиђено у чл.4 (4) Стразбуршког споразума), или коришћењем главних група МКП-а. Заводи који користе само главне групе настављају своје обавезе како је предвиђено чл.4 (3) Стразбуршког Споразума. Са друге стране, они заводи чије су патентне колекције обухваћене такозваном РСТ минимум документацијом обавезни су да користе комплетну класификацију (тј. садашњи напредни ниво).

Заводи треба да обавесте Међународни Биро (ИБ) да ли класификују патентне документе користећи поткласе, до нивоа главних група или комплетну класификацију. Међународни Биро ће објавити редовно ажуриран списак са напред наведеним подацима о свим заводима.

Општа правила за класификовање ће се примењивати за све кориснике МКП-а.

Нова унифицирана структура класификације би омогућила да Заводи који тренутно користе основни ниво, имају могућности да користе главне групе у тој структури.

Ажурирана верзија МКП-а ће се публиковати једном годишње, искључиво у електронској форми, и ступиће на снагу 1. јануара сваке године. Матична база података (важећи фајлови са изменама и допунама - Master files) и рана Интернет публикација ће се објављивати шест месеци пре ступања на снагу текућег издања на енглеском и француском језику, а у циљу омогућавања правовремене припреме

националних верзија МКП-а, радних листа и одговарајуће рекласификације.

Комитет ће разматрати на следећој Седници могућност повећања броја публикација са једне на две годишње у случају да се у том периоду појави велики број измена и допуна.

Међународни Биро ће истовремено прегледати ИТ алате који ће се ставити на располагање заводима за преводње и припрему националних верзија МКП-а, укључујући и објашњења, а све у циљу повећања њихове ефикасности у раду.

Такође, предвиђа се и помоћ од стране Међународног Бира и то (по посебном захтеву) заводима са ограниченим Интернет могућностима, а у циљу обезбеђења верзије класификације која је одговарајућа за њихове потребе.

Наглашено је да ће "PDF" верзија бити доступна најкасније на дан ступања на снагу нове МКП верзије. Такође ће се омогућити у зависности од потреба завода-корисника МКП-а, преглед само главних група, као алтернатива прегледа пуног текста МКП-а.

Убудуће се класификације неће публиковати у папирној форми.

Такође је наглашено да ће се развој МКП-а убрзати уз помоћ стварања јединствене, унифициране међународне класификације патената уз интеграцију локалних класификационих система као што су Америчка класификација, Европска класификација (ECLA) и FI/F Term јапанског завода за патенте, са новим радним процедурама.

У оквиру нових радних процедура појачаће се коришћење е-форума помоћу кога ће експерти обављати техничке консултације у циљу постизања веће ефикасности и квалитета ревизије.

Текућа структура рада и процедуре ревизије МКП ће се наставити и током 2010. године.

О свим поменутих изменама, Комитет експерата ће извести Скупштину МКП Уније септембра 2009, од које се очекује да исте одобри.

Комитет се такође сложио да побољша ефикасност ревизионог процеса. У том смислу одлучено је да се унифицира процедура ревизије са проширеним учешћем завода. Све ревизионе пројекте ће, као и до сада, прво разматрати Радна Група за Ревизију МКП (IPC/WG); након завршетка, пројекти ће се проследити Комитету на коначно усвајање. Рад Радне Групе за Ревизију МКП (IPC/WG) ће се ограничити на пројекте који се односе на ревизију, дефинисање (Д пројекти) и одржавање (М пројекти), са приоритетом на ревизионим пројектима и одговарајућим Д пројектима. У оквиру нових радних процедура

појачаће се коришћење е-форума за техничке консултације експерата, а све у циљу постизања веће ефикасности и квалитета ревизије.

Комитет се даље сагласио да све снаге треба усмерити ка рекласификацији релевантне РСТ минимум документације пре датума ступања на снагу ревизионе шеме. Уколико се оваква потпуна рекласификација не може постићи, Комитет може одлучити, нарочито у случају активних – нових технологија, да објави релевантну шему у циљу омогућавања ткз. „front file“- текуће класификације.

WIPO ће формирати централизовани систем у циљу организовања, олакшавања и надгледања рекласификације и праћења учешћа великог броја завода на овом послу. У циљу систематичне рекласификације патентних докумената према најновијој верзији МКП-а, ЕПО је припремио радну листу са документима за све заводе за индустријску својину који могу учествовати у рекласификацији; листа погодна за downloading је постављена на WIPO IPC website-y.

Комитет је нагласио да има податке о значајном броју патентних докумената који још нису рекласификовани. У том смислу Комитет је позвао све заводе – учеснике да уложи максимални напор у циљу што скоријег завршетка рекласификације уз коришћење заосталих радних листа. Секретаријат је информисао да се ове заостале радне листе могу пронаћи на WIPO IPC reclassification website-y.

Делегација из ЕПО-а је истакла да ће нови сет заосталих радних листа бити ускоро доступан.

Делегација из Бразила је информисала Комитет да су на сопствену иницијативу развили "алате за рекласификацију" за мале и средње патентне заводе и да ће ови алати ускоро бити прилагођени и за подешавања ткз. заосталих радних листа.

ЕПО је затражио да се за следећи састанак припреми посебна статистика која би се односила на статус рекласификације патентних докумената који се сврставају у РСТ минимум документацију.

Такође је дат кратак осврт на МКП интернет публикацију и нове процедуре које би олакшале увођење будућих измена и допуна МКП-а тј. ревизије МКП публикација.

Комитет је такође обавестио да замена садашњег IPCPUBPREP software пакета допушта заводима да створе сопствену МКП публикацију на националном језику, што је такође доступно за download-овање на WIPO website-u (видети документ IPC/CE/41/6).

Даљи ток рада Радне Групе за Ревизију МКП (IPC/WG) је био усмерен на активности ткз. „IP5 групе“ која је састављена од кооперативних Завода (European Patent Office-EPO, Japan Patent Office-JPO,

Korean Intellectual Property Office-KIPO, State Intellectual Property Office of the People's Republic of China- SIPO, United States Patent and Trademark Office – USPTO).

Сваки пројекат прослеђен од стране IP5 кооперативних Завода укључујући и трилатералне пројекте хармонизације, биће аутоматски укључени у ревизиони програм МКП-а и разматрани по приоритету. Ови пројекти ће се разматрати током ткз. “МКП фазе” у циљу утврђивања њиховог усаглашавања са МКП правилима и обезбеђења јасноће и општег међународног разумевања њиховог садржаја. Измене већ предатих предлога, које би захтевале додатну рекласификацију, у односу на оригинални предлог ће се разматрати само у посебним случајевима, уз ваљано образложење и сагласност завода – ствараоца пројекта.

Одржане су и две презентације на тему процедуре ревизије и публикавања МКП-а, и то једна од стране ЕПО-а: “Осврт на будућност класификације” и друга презентована од стране ЈПО - а “IP5 Hybrid Classification Project through Mapping Tool”.

Истовремено је ЕПО представио циљеве пројекта Опште хибридне класификације –који се могу свести на:

- Избећи непотребно дуплирање посла,
- Побољшати ефикасност међународног претраживања,
- Искористити моћ постојећих унутрашњих интерних класификационих система,
- Побољшати ефикасност и квалитет патентног испитивања (видети IPC/CE/41/6).

У том смислу, потребно је следити следеће циљеве:

- Развити МКП до потребног нивоа,
- Започети пилот пројекте за оцењивање трошкова и добити,
- Користити ткз. мапинг алате између постојећих интерних шема у циљу идентификовања подручја у којима су шеме врло сличне и унапредити претраживање коришћењем интерних шема,
- Блиско сарађивати са WIPO и МКП заједницом.

Сви ревизиони пројекти ће се и даље иницијално разматрати од стране Радне Групе, а након завршетка исти ће се проследити Комитету на финално усвајање. Делатност Радне Групе би се ограничила на разматрање ревизионих пројеката (revision projects), Д пројеката (definition projects) и М

пројеката (maintenance projects), са приоритетом на ревизионим пројектима и одговарајућим Д пројектима. Комитет ће оцењивати на својим следећим седницама, колико је радна група ефикасно испунила циљеве и, уколико није, шта треба учинити за поновни преглед.

Комитет је обавестио Радну групу о накнадној одлуци која се односи на процес дискусије ревизионих пројеката, припрему и проверу француске верзије, затим финално усвајање ревизионих пројеката, процедуре ревизије МКП Стандарда, Матичне базе података и основних МКП докумената од стране Комитета (видети Анекс 3 уз документ IPC/CE/41/6).

Сви завршени и прихваћени пројекти од стране Комитета на 41. седници и од стране Подкомитета за напредни ниво (AL) на њиховој 6. и 7. седници ће ступити на снагу 01. јануара 2010. године и то заједно - основни и напредни ниво.

Нова структура ће ступити на снагу са релевантном МКП публикацијом 01. јануара 2011. године.

Међународни биро је позван да узме учешће у представљању корисницима поједностављене структуре и процедуре МКП -а на другој радионици током фебруара 2010. године.

Одбор је усвојио, уз неке модификације, амандмане одобрене од стране Радне групе на претходним (19. и 20.) седницама. Ови амандмани, заједно са амандманима усвојеним на шестој и седмој седници Подкомитета напредног нивоа, бити увршћени у следећој верзији оба нивоа МКП-а, и основног и напредног, који ће ступити на снагу 1. јануара 2010.

Како је седма седница Подкомитета напредног нивоа била последња, сви нерешени ”А” пројекти су пребачени и укључени у програм Радне групе. Од сада, ”А” пројекти ће означавати ревизионе пројекте који потичу из IP5 Завода, а ”С” пројекти ће означавати ревизионе пројекте који би били укључени у МКП ревизиони програм од стране Комитета.

Радна група је обавештена и о одлукама Комитета о увођењу новог типа универзалне индексне шеме, где је, конкретно, Комитет одлучио да не усвоји увођење нових секција у МКП-у, и да прегледа и измени, односно допуни, све параграфе Упутства везаних за класификацију и индексирање, а у циљу њиховог поједностављивања.

5. УКЛАЊАЊЕ НЕОГРАНИЧАВАЈУЋИХ НАПОМЕНА ИЗ КЛАСИФИКАЦИОНЕ ШЕМЕ

Дискусија је базирана на изради пројекта М 032, поднесеног од стране Међународног Бироа (IB),

а који се односи на уклањање напомена из наслова класа.

Радна група се договорила да се све напомене из наслова класа уклоне из класификационе шеме, без обзира на њихову природу. Радна група је такође одобрила, уз неке модификације, акције које су предложене у Анексу 45, а које се односе на место постављања раније уклоњених напомена.

За неколико класа није могао бити постигнут споразум у вези типа напомене (да ли су ограничавајуће или информативне), односно места где их преместити. Због тога је Радна група тражила предлоге за те случајеве и договорила да створе три нова пројекта за одржавање М 033 до М 035 за машинство, електротехнику и хемију. Сходно томе, Међународни биро је позван да у складу са тим подели већ поменути Анекс 45, као и да укључи питања везана за исти. Радна група је такође позвала да се дају коментари на предложене поступке за уклањање напомена у одељку Ф, а везано за Анекс 1 пројекта М 033.

Што се тиче напомене везане за класу Ц08, у наслову класе Ц07, Шведска је требала да поднесе предлог за Напомену у класи Ц07 која ће заменити напомену у класи Ц08 за новонастале пројекте одржавања М 714, са Шведском као подносиоцем извештаја.

Што се тиче уклањања неограничавајућих напомена из подкласе у којима су ”Д” пројекти (definition projects) већ завршени до краја 2007. године, Радна група се сложила да се направе три нова пројекта одржавање М 036 до М 038 за машинство, електротехнику и хемију. Сходно томе, Међународни биро је позван да подели Анекс 41 пројекта М 032, који садржи неколико предлога за преостале подкласе. Међународни биро треба да, за следећи круг коментара, припреми и усагласи предлоге за одобрење од стране Оперативне групе.

Секретаријат је обавестио Радну групу да Анекс 10 пројекта WG 191 садржи табеларни приказ, у коме су дефинисани задаци за уклањање неограничавајућих напомена из сваке подкласе, а која ће се ажурирати након ове седнице како би се узели у обзир најновије одлуке.

6. МКП ревизиони програм

Радна група је констатовала одлуку Комитета експерата са своје четрдесет прве седнице да ревизиони пројекти, укључујући и ревизионе пројекте напредног нивоа, морају бити разматрани од стране Радне групе и упућени Одбору за коначно усвајање. Констатовано је да ће пројекти који потичу из IP5 завода бити означени словом „А”, а ревизиони пројекти укључени у ревизионе програме МКП-а

преко Комитета експерата биће означени словом „Ц”.

У наставку седнице, Радна група је разматрала девет „Ц” ревизионих пројеката, као и седамнаест „А” пројеката прослеђених из бивших ALS, и прихватила предложене измене и допуне (Технички Анекс 1 до 29).

7. МКП дефинициони програм

На основу сакупљених релевантних "Д" пројеката, Радна група је дефинисала нове рокове и именовала заводе за припрему француске верзије. Додатне информације су дате у даљем тексту.

Радна група је приметила да се у неким случајевима одобрени предлози за уклањање неограничавајућих напомена разликују у односу на дефинисани одобрени предлог. Договорено је да у таквим случајевима ранији (пређашњи) има приоритет.

Радна група се такође сложила да се креирају нови дефинициони пројекти за све оне поткласе за које су предлози за дефиниције група већ разрађени у А пројекту. Ови нови пројекти ће остати суспендовани док се неки заводи не јаве добровољно за подносиоца извештаја. Радна група је даље констатовала да је неколико дефиниционих пројеката који су креирани на 16. седници Радне групе још увек обустављени. Због тога су заводи позвани да размотре да ли имају довољно средстава да волонтерски окончају обустављене пројекте.

Упутство за писање прилога за "Подлистак Гласника интелектуалне својине"

Ради једнообразности и лакше обраде, молимо да приложи за *Гласник интелектуалне својине* имају следећу форму:

- текстови морају бити куцани или штампани на белој банкпост хартији, са једне стране, са 27-30 редова на једној страни и маргинама које обезбеђују 60 словних места у једном реду;
- уз то, потребно је слати дигитални запис текста на дискети од 3 ½ инча, CD (compact discu) или ел. поштом на e-mail: iuzelac@zis.gov.rs уз коришћење True Type unicode фонтова пожељно Times New Roman, из разлога компатибилности са другим корисницима и што оперативни систем на коме се ради у Заводу има инсталирану подршку за такве карактере;
- сваки рад мора бити потписан (име, презиме, адреса и број телефона аутора, стручна и/или научна титула, функција на послу и место запослења);
- напомене (фусноте) се прилажу на крају рада (како на примеру, тако и на дигиталном запису), означене бројевима од 1 па надаље, кроз цео рад;
- приликом цитирања књига, неопходно је придржавати се следећег редоследа података: презиме и име аутора, назив књиге, место издавања, година издавања, редни број тома, број странице и евентуално број тачке или пасуса;
- приликом цитирања радова из часописа и других периодичних публикација, неопходно је придржавати се следећег редоследа података: презиме и име аутора, назив рада, назив часописа или публикације, број часописа или публикације, година излажења, број странице;
- приликом цитирања управних и судских одлука поред службених ознака и датума доношења навести и извор у којем је одлука објављена;
- уколико се једно дело истог аутора цитира у више напомена (фуснота) које нису непосредно једна иза друге после презимена и имена аутора, други и сваки наредни пут може се употребити скраћеница op.cit. Уколико се једно дело истог аутора цитира напоменама које следе непосредно једна за другом, после првог навођења потпуних података о аутору и делу може се употребити скраћеница ibid.

Радови који не одговарају овим стандардима неће моћи бити објављени без дораде, па је зато важно да се аутори већ при писању прилога за *Гласник интелектуалне својине* придржавају ових упутстава.
