

Registration number 71

Geographical indication

Čigota

Description:

Geographical indication Čigota is the first indication of geographical origin registered for offering of services in the Republic of Serbia. This geographical indication refers to the medical and tourist services. The mentioned services got their name after the Čigota, mountain pass on the mountain of Zlatibor, with the highest peak on 1422 meters of altitude above the sea level, dominating the landscape. It is of cone shape, occasionally with trees consisting of white and black pine, beech and oak, while the grass vegetation dominates. For the indications of geographical origin, it is characteristic to have the symbiosis of natural and human factors that produce or give to the service special characteristics and quality, and for Čigota service, both of these factors are equally present. Climate with air currents, altitude, clean air with almost no damp and with characteristic concentration of light jones in the air and the lack of allergic matter, water with the high pH, are the most important natural factors.

Geographical area:

Services with the geographical indication Čigota are provided exclusively on Zlatibor, on the part of the territory of Čajetina municipality.
